\* Brands that can be used may differ depending on the service.

The addition of “au PAY” further increases our lead in providing the most payment methods in the industry in Japan\*. The global multi-payment service "TakeMe Pay, which has served users from over 99 countries, will continue adding payment brands and expand vision of a cashless society in Japan.

\* according to our research

## How to use au Pay with TakeMe Pay

You can use it by scanning the TakeMe Pay QR Code with the au Pay app

## About au PAY

"au PAY" is one of Japan's leading smartphone payment companies with 24.5 million members. Users can shop and pay simply by scanning QR code at merchants, or by having the merchants scan QR code within the users' "au Pay" app.

## About the global multi-payment platform TakeMe Pay

TakeMe Pay is Japan's "All-in-One" payment service that aggregates domestic and international smartphone and credit card payments. TakeMe Pay allows users to make payments by smartphone at merchants simply by scanning the QR code using their preferred payment method without having to install a new app. Furthermore, the payment type is not limited to smartphone payments, but credit card payments are also available.

In addition, since no special terminal is required other than a QR code stand display, TakeMe has been advantageous in many situations where payment devices cannot be installed, such as rickshaws, taxis, and on-site services. TakeMe will continue to add more payment brands and provide value added services to store operators and businesses.
